
TrueSource™ Dashboard 2.8

Release Notes

Summary

As part of GS1 Canada's commitment to providing our subscribers with global standards-based solutions that include data excellence tools, we are pleased to announce release 2.8 of TrueSource™ Dashboard.

This document outlines updates that are available with the new release.

Features in version 2.8

- Changed user interface – The Home page for data providers has a more intuitive design, showing tabs instead of buttons to navigate between My TrueSource™ Dashboard and My Trading Partners.
- The Search feature has moved to a centralized location so that Search is available all the time.
- Other enhancements include:
 - Refreshed user interface graphics, fonts, colours and labels.
 - When you capture a screenshot of a Dashboard layout, this user interface has been changed to include a drop-down to indicate the file type.
