

ProSYNC v 1.3

Release Notes

GS1 Canada is continually enhancing New ProSYNC based on community business requirements, Global Standards Alignment and feedback from our users.

This document shows a summary of new and revised features.

- Integration with Product Certification

Data providers who are registered to use Product Certification can view product certification status, product images, a few product attributes and multiple product versions, if available.

Product Certification enables brand owners and subject matter experts to certify all content in one user interface for multiple business processes, helping to improve data quality.

- GPC Alignment

In addition to the existing Global Product Classification (GPC) Cannabis codes available to data providers, GS1 Global has added new Cannabis classifications. The table below outlines the change details.
