

ECCnet New Item Setup

Powered by TrueSource™

A Faster, More Efficient Way to Manage the Product Listing Process

No matter where you are in the supply chain or what size your business is, ECCnet New Item Setup streamlines the product listing process while ensuring your data meets Canadian trading partner and regulatory requirements.

With the tools you need to seamlessly load, store, share and access standardized, accurate and complete bilingual product data, products are listed and brought to market quickly and successfully through our efficient one-to-many process.

How ECCnet New Item Setup Solution Can Benefit Your Business

- 

Maximize Sales Opportunities
Standardized, bilingual product data that meets your trading partner requirements helps optimize the purchase order process, improving speed-to-market and accelerating the listing of your products.
- 

Address Trading Partner Specific Listing Needs
Industry defined attributes enable you to meet Canadian trading partner needs and regulatory requirements, reducing the risks of delaying listings and launches or failure to comply with regulations due to incomplete or incorrect data.
- 

Increase Operational Efficiencies
The ability to share product data with multiple trading partners from one place eliminates the need for the same work being repeated multiple times, which can lead to costly inefficiencies and additional resources being required to meet timelines and demands.

It Starts with Data Excellence

GS1 Canada's commitment to be the primary source of truth for standardized, reliable and complete product data is foundational to all Industry Managed Solutions and drives the ongoing development of data excellence tools and processes, allowing trading partners to access 100% accurate, perpetually cleansed and updated product data and enables businesses of all sizes to fuel important business decisions.

At-a-Glance

6 billion GS1 barcodes are scanned every day across the globe.

Over 5,800 Canadian data providers and brand owners load product data once to share with up to **77 data recipients**.

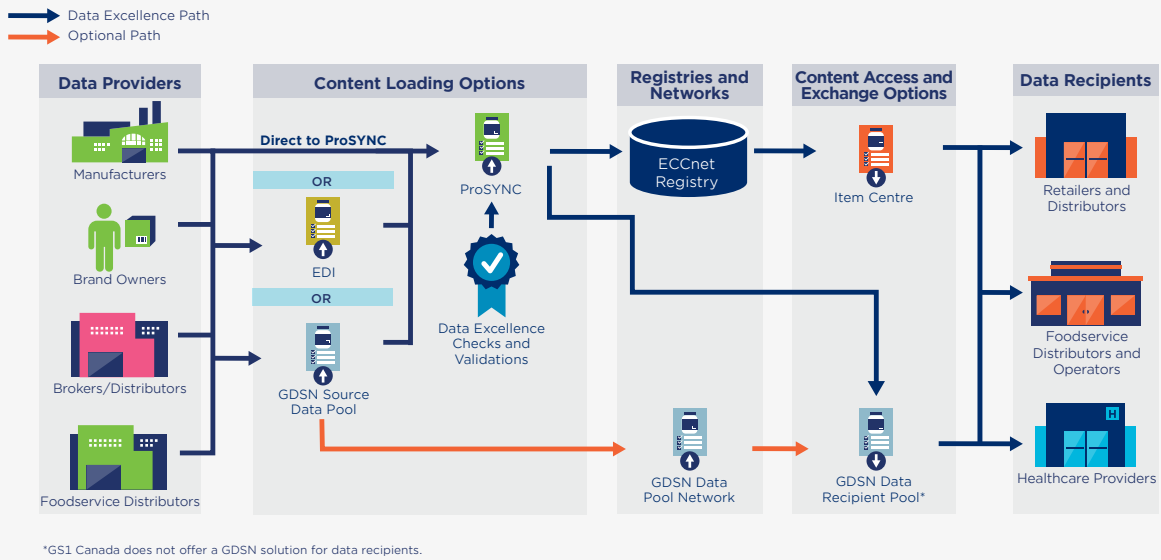

With an average of **over 200,000 annual product updates**, ECCnet Registry is the largest national single source of truth for reliable, bilingual product data.

The **One-to-Many** approach ensures standardized data is loaded once, then efficiently shared with multiple trading partners at the same time from a single source of truth, ensuring accuracy and consistency while saving significant time and resources.

How the ECCnet New Item Setup Process Works

Tools and Services Available

ECCnet Registry

With perpetually cleansed and updated product information for over 700,000 products, ECCnet Registry was created at the direction of industry to meet the needs of Canadian business, including mandatory attributes unique to product categories and sectors that are specifically requested by Canadian Industry, removing any confusion or doubt about the data required to fuel important business processes and helping build trust between trading partners across the value chain.

Flexible Data Loading Options

ECCnet New Item Setup's flexible loading options enable you to easily share product data with your trading partners - whether you use GDSN, EDI or, for increased data quality, ProSYNC. All loading options are compatible with ECCnet Registry, providing robust system validations and updated data.

TrueSource™ Dashboard - Track Your Data Completeness

Designed to facilitate transparency between data providers and data recipients, TrueSource™ Dashboard is a data excellence tool that provides visibility to the status of your product data across multiple business processes. It can help you quickly identify, track and action gaps to achieve a 100% accurate and complete product catalogue - facilitating trading partner collaboration and increasing sales opportunities as those gaps are closed.

About GS1 Canada
 GS1 is a neutral, not-for-profit organization that develops and maintains global standards for business communication. In Canada, through our unique community management role, we actively collaborate with business leaders, advisory councils and industry work groups in identifying common, non-competitive business process issues to develop and implement non-proprietary solutions that leverage global standards and improve supply chain management.
