

ECCnet New Item Setup

Powered by TrueSource™

A Faster, More Efficient Way to Manage the Product Listing Process

No matter where you are in the supply chain or what size your business is, ECCnet New Item Setup streamlines the product listing process while ensuring you receive product data that meets your requirements.

With the tools you need to quickly access, search or automatically receive product data from ECCnet Registry, Planogram Content Registry and Foodservice Content Registry, access and exchange the content you need when you need it.

Data received through ECCnet New Item Setup is the most up-to-date, bilingual, perpetually cleansed product data possible and meets the requirements of Canadian industry.

How ECCnet New Item Setup Solution Can Benefit Your Business

Maximize Sales Opportunities

Standardized, bilingual product data that meets your requirements helps optimize the purchase order process, improving speed-to-market and accelerating the listing of products.

Optimize Your Resources

As Canada's largest national product registry, ECCnet enables you to quickly and conveniently access accurate product data from multiple vendors when you need it, from one place, rather than requesting content from your vendors one by one, saving you time and resources.

Streamline Your Business

Visibility to the status of product data for multiple vendors in one place eliminates the need for maintaining duplicate scorecards by department and provides insights that can be used to enhance category planning, optimize resource allocation, and facilitate informed business decisions.

It Starts with Data Excellence

GS1 Canada's commitment to be the primary source of truth for reliable and complete product data is foundational to all Industry Managed Solutions and drives the ongoing development of data excellence tools and processes, allowing trading partners to access 100% accurate, perpetually cleansed and updated product data and enables businesses of all sizes to fuel important business decisions.

At-a-Glance

6 billion GS1 barcodes are scanned every day across the globe.

Over 5,800 Canadian data providers and brand owners load product data once to share with up to 77 data recipients.

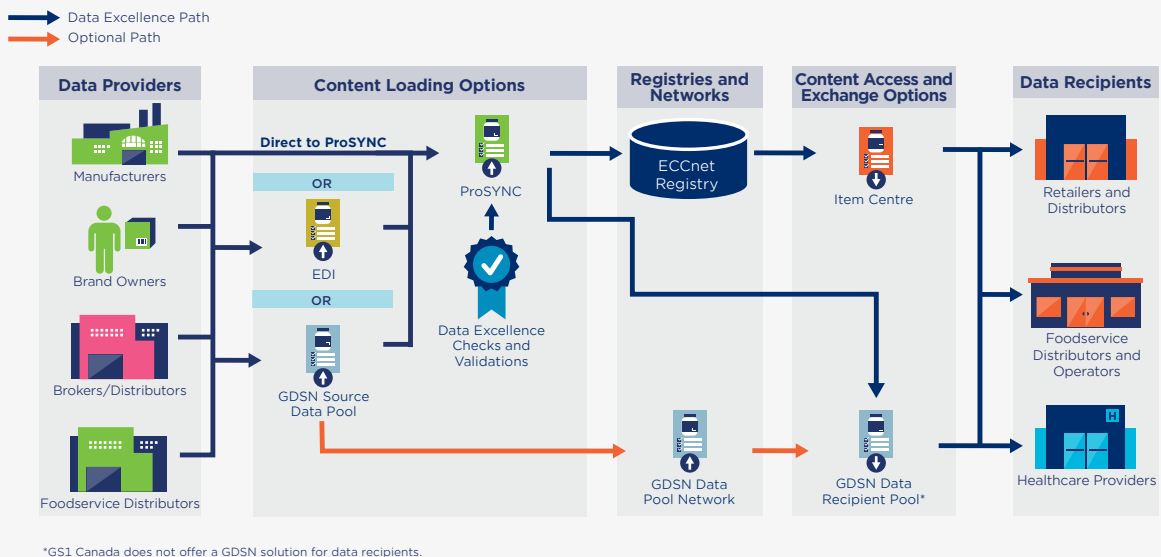

With an average of **over 200,000 annual product updates**, ECCnet Registry is the largest national single source of truth for reliable, bilingual product data.

The **One-to-Many** approach ensures standardized data is loaded once, then efficiently shared with multiple trading partners at the same time from a single source of truth, ensuring accuracy and consistency while saving significant time and resources.

How the ECCnet New Item Setup Process Works

Tools and Services Available

ECCnet Registry

With perpetually cleansed and updated product information for over 700,000 products, ECCnet Registry was created at the direction of industry to meet the needs of Canadian business, including mandatory attributes specifically requested by Canadian industry, removing any confusion or doubt about the data required to fuel important business processes and help build trust between trading partners across the value chain.

Flexible Content Access and Exchange Options

Built in accordance with trading partner needs and global standards, Item Centre is a central hub for accessing and receiving product data from your vendors. Designed as a secure online tool to access the accurate and complete product data you need when you need it, Item Centre enables you to quickly download, search or automatically receive product data from ECCnet Registry.

TrueSource™ Dashboard

Designed to facilitate transparency between data providers and data recipients, TrueSource™ Dashboard is a data excellence tool that provides visibility to the status of the product data across multiple business processes. It can help you quickly identify, track and action gaps to achieve a 100% accurate and complete product catalogue – facilitating trading partner collaboration and increasing sales opportunities as those gaps are closed.
